

## Mine warning signs

Art.No. 0202200

Mine signs are now available in any language at a minimum order of 500 pieces. These signs are available for delivery anywhere in the world within a lead-time of 14 days.

These signs suit International Standards in size and quality. As a standard the signs are in white in languages (to be determined) embossed onto red front square and white backing in the sizes shown below. (The universal symbol for danger is the skull and crossbones, however the national mine action authority may specify another symbol if the skull and crossbones is not appropriate). These variations are available at no extra cost.

The signs are manufactured in lightweight, durable **correx** (reinforced corrugated plastic) in the square format and will come with corner support holes and plastic cable ties to facilitate quick and permanent fixing.
