

Handtool Sets

The handtools are available individually or as a set. The customer is welcome to specify the contents of the set they require, and we will design and produce a case or tool-roll that is appropriate. Our standard construction includes velcro straps to secure tools in position, a tough lining and pockets lined with polycarbonate to prevent sharp tools from snagging

The bag has reinforced sides and straps that enable it to be carried as either a hold-all or as a back-pack. When a set of handtools is ordered together with a protective equipment set, straps are fitted that allow both to be carried as one unit.
